

# Coin Operated Height-Weight Machine

HWM 204 PC is the most advance coin-operated weighing machine. It is incorporated with a highly accurate ultrasonic height sensor which measures the height to the nearest 1mm and a very sensitive load cell with the resolution of 100 grams. (A T-shirt is already 250 grams)

This machine is very user friendly; it's has a LCD display with step-by-step instructions and backup with a voice system.

The flexibility of this machine to switch from charge mode to free mode made it the most profitable machine. For free mode, it could be used as a health-screening machine in hospital, school, health center & spa. Or set at charge mode to place at theme parks, railway station, bus station, theatres etc.

Beside, this machine is strong and reliable. It can be left alone for years from trouble and it operation is maintenance free.

## Specification

- **2 x 16 LCD with back light**
- **Weight (Load cell)**
  - Sensitivity : 1mV/V
  - Accuracy : 0.05% of reading range
  - Resolution : 100g, 200g, 500g, 1Kg
  - Range : 0 ~ 150 Kg
  - Error Limit : ±1.0% of final value
- **Ultrasonic Height Sensor**
  - Accuracy : 0.05% of reading range
  - Resolution : 5mm, 1cm
  - Error Limit : ±1.0% of final value
- **Audio Guide System**
- **Coin Slot**
  - Able to accept 5 different denomination coins
- **Printer with Auto cut**
  - High-speed dot matrix printer
- **Timer**
  - 24 Hours timer able to set machine to turn on or off
- **Operation mode**
  - Charge mode
  - Free mode
- **Power Supply**
  - 110/230V AC @ 50/60Hz, 80 VA
- **Environmental**
  - Operation Temperature : -10° C ~ 50° C
  - Storage Temperature : -25° C ~ 80° C
- **Machine Weight**
  - Approximate 50 Kg
- **Dimension**
  - 41 cm (Wide) x 64 cm (Depth) x 260 cm (Height)

## Features

- |                                    |                               |
|------------------------------------|-------------------------------|
| 1. Measure Weight                  | 7. Accounting Report          |
| 2. Measure Heights                 | 8. BMI Report                 |
| 3. Calculate Ideal Weight          | 9. Technician Report          |
